PROFESSIONAL EXPERIENCE

CARTE

Full Stack Software Engineer, Murrieta, CA

Aug 2022 - Present

Carte is an interactive digital menu and ordering platform post pandemic web application built for restaurants, incorporating real time menu management with dining and online ordering.

- Created component where Admin can schedule discounts using date and time inputs.
- Implemented react front-end calendar for efficient discount scheduling and added to a database, connecting stored procedures to middle tier, with server-side validation.
- Designed and built SQL Server reference tables, procedures, and diagrams that connect to .NET via ADO.NET.
- Designed user models, interfaces, controllers front-end and back-end functionality.
- Created API endpoints using .NET Core framework and C# to connect the front and backend.
- Use Agile Methodology to ensure efficiency and efficacy through daily collaboration with the team during stand-ups, code reviews, code talks, and Trello boards.
- To ensure quality of code, we used Git via GitHub as our source control system.
